You can also follow the steps given below to resolve this problem:.Q: using c with dbms_output in procedural language How to change the output of a PL / Stored proc to text in Oracle? A: Assuming that you mean PL/SQL, the standard way is to use DBMS_OUTPUT.PUT_LINE(...). However, for procedures that call this you can't change the output because it is controlled by the language context. I don't remember if PL/SQL has a way to pass the current language context in the call to DBMS_OUTPUT.PUT_LINE. However, maybe something like the following would be enough. Declare a dummy language context. Pass it to PL/SQL to act as the current context Or, you can explicitly set the output language in the procedure (DBMS_OUTPUT.PUT_LINE(...,'text');) A:

l210 on device windows xp.Laneway rockers have been dubbed the perfect solution for a DIY project and for living and enjoying your backyard. They are easy to set up and remove, and the resulting structure can be playful, beautiful, unique and add a touch of rustic to the most standard of blank walls. The photos below show a few of the various designs that you can make yourself, but if you want to make your own you can find a bunch of step-by-step instructions on how to build your own at your local hardware store. The Extreme version lets you create a larger and more uniquely shaped space than just 3 posts. It is also more stable, but you will have to anchor it to the ground to prevent it from toppling over. The rock wall continues to the ground, so this is a very long wall. There is also a option to use one end of the wall as a platform with an attached step ladder. The posts are connected by a cross beam and the height of the wall can be adjusted by adding additional supports for the cross beam. The latest print from the company is inspired by a bunch of old school devices and just feels like a little old time robot. The model is a new creation that can be printed and assembled at home. The positive is that you can freely customize the designer, change the position of the eyes and change the mouth. The arms can also be lengthened to produce a robot with legs. If you're a fan of working with many materials, this project from the folks over at Hack a Day is a perfect beginning to your creative journey. The idea behind this project is to create a paper model that you can then 3D print and end up with a bucket shaped box. The cardboard box can be taken apart and should have enough parts to make as many different models as you like. This project is a creative way of building a quick and easy lamp for any room in your home. The only thing you will need to get started is a wood board that is 2-3 inches thick. The design also works
