**\$57,100**

Fixed-Base Operator (FBO) provides aircraft services. Our FBO mainly focuses on aircraft re-fueling with both Jet-1A and 100LL types of fuel. Jet-1A fuel is delivered to plane stands using fuel tankers, while 100LL fuel is delivered via centralized pipeline. Fuel is purchased via pipeline at refineries on per-shipment contractual basis. As fuel prices fluctuate, your goal is to buy low at refineries and sell high to aircraft operators. Keep in mind thou, that selling too high may have negative impact on aircraft operator opinion of our airport. On the other hand, fuel sales and aircraft maintenance services are lifeblood of airport's economy - so try to find the balance between good service and good profit.
